Question 1

Which two statements about multi section backup are true?

Options:

A- It is available only for full backups.

B- It supports incremental backups and image copies.

C- Backup for each data file is divided into sections and is backed up in parallel. However, for image copies, sections are backed up sequentially.

D- For image copies, sections are backed up in parallel and recomposed at the end.

Answer:

B, D

Explanation:

https://docs.oracle.com/database/121/BRADV/rcmbckba.htm#BRADV380

Specifying Multisection Incremental Backups

Making Multisection Backups Using Image Copies

Question 2

Question Type: MultipleChoice

Your customer is looking for a solution that meets these four needs:

1 - Replicate data from source to target for reporting purposes.

2 -Replicate data from one source to multiple targets.

3 - Replicate data between two databases for instant failover.

4 - Replicate data from multiple sources to a single target for a data warehouse.

Which GoldenGate-supported topology would you recommended?

Options:

A- Uni-directional for 1
Peer-to-peer for 2
Bi-directional for 3
Consolidation for 4
B- Peer-to-peer for 1
Broadcast for 2
Bi-directional for 3
Consolidation for 4
C- Uni-directional for 1
Broadcast for 2
Bi-directional for 3
Consolidation for 4
D- Peer-to-peer for 1
Consolidation for 2
Broadcast for 3
Cascading for 4

Answer:

C

Question 3

Question Type: MultipleChoice

Which three tasks can you perform in Database Express?

Options:

A- View performance and status information about the database instance.
B- Start up the database.
C- Shut down the database.
D- Create database structures.
E- Manage users and security.

Answer:

A, D, E

Question 4

Which command do you use to check for block corruption by validating the database?

Options:

A- RMAN> VALIDATE CHECK LOGICAL
B- RMAN> VALIDATE BACKUP
C- RMAN> VALIDATE CORRUPT BLOCKS
D- RMAN> VALIDATE DATABASE

Answer:

D

Explanation:

since 11g the syntax got changed to

RMAN> validate [check logical] database;

Example:

DGMGRL> validate database verbose d1

output include:

Block Corruptions found NO NO

Question 5

Identify two solutions that Oracle provides for patch conflict.

Options:

A- merge patch

B- combine patch

C- overlay patch

D- dual patch

E- super patch

Answer:

A, C

Question 6

Question Type: MultipleChoice

Examine the error:

GSM-45054: GSM error or NET-40006: unable to start GSH

What is the cause of this error, and what troubleshooting steps should you perform?

Options:

A- The GDS catalog database of its listener may be down. Verify that the GDS catalog database and its local listener are running.

B- The GDS pool database may be down. Make sure that the GDS pool databases are up and the service is enabled and started.

C- The GDS pool database's local listener may be down. Make sure that it is running.

D- The global service may be down. Verify that the pool databases are up and the service is started.

E- The global service may be disabled. Make sure that the pool databases are up and the service is enabled and started.

Answer:

A

Explanation:

https://docs.oracle.com/database/121/GSMUG/trouble.htm#GSMUG706

Question 7

Question Type: MultipleChoice

Which two statements are true regarding undo data records?

Options:

A- They are required to support Flashback features.
B- They are not required if Flashback features are enabled.

E- Undo records contain copies of data as it appears before a change is made.

Answer:

A, E

Explanation:

http://docs.oracle.com/cd/E11882_01/server.112/e25494/undo.htm#ADMIN11463

Question 8

Question Type: MultipleChoice

Which targets can be managed by using Enterprise Manager Cloud Control?

Options:

A- Hosts and databases
B- Hosts, databases, and application servers
C- Application servers and web applications
D- Databases, Oracle Management Server (OMS), and Oracle Management Repository (OMR)
E- Databases, application servers, and web applications
F- Hosts, databases, application servers, web applications, OMS, and OMR

Answer:

F

Explanation:

http://www.oracle.com/technetwork/oem/framework-infra/wp-em12c-security-best-practicesv2-149338 3.pdf (page 3, second bulleted point, last couple of sentences)

Question 9

Consider 10 scenarios that result in database downtime. Which five of them are considered as planned downtime?

Options:

A- addition or removal of nodes, memory, or disks
B- changing configuration parameters, upgrading, or patching Oracle software
C- file deletion
D- migrating to cluster architecture
E- dropped database object
F- table definition changes
G- runaway processes that consume system resources
H- adding table partitioning
I- operating system or storage device / driver failure
J- database or application deadlocks

Answer:

A, B, D, F, H

Explanation:

http://docs.oracle.com/cd/E11882_01/server.112/e10803/schedule_outage.htm#HABPT5083
