# Question 1

---

Question Type: MultipleChoice

---

An administrator is tasked to deploy a new eight-node VMware vSAN Express Storage Architecture (ESA) cluster.

What are three minimum requirements to accomplish this? (Choose three.)

## Options:

---

- A- 10GbE network interfaces
- B- 256GB Memory
- C- 25GbE network interfaces
- D- PCIe flash device (NVMe)
- E- SAS solid-state disk (SSD)
- F- 128GB Memory

## Answer:

---

C, D, F

# Question 2

---

Question Type: MultipleChoice

---

An administrator creates a cluster by joining a Medium sized VMware Cloud Foundation (VCF) Operations for Logs node to an existing Medium sized single-node deployment.

The secondary node of the cluster fails, degrading the functionality of VCF Operations for Logs.

What action should the administrator take to create a healthy active cluster?

## Options:

---

- A- Scale up the VCF Operations for Logs primary and secondary node to size Extra Large.
- B- Scale up the VCF Operations for Logs primary and secondary node to size Large.
- C- Rebuild the VCF Operations for Logs cluster secondary node and place the cluster back into operation.
- D- Rebuild the VCF Operations for Logs cluster secondary node and add an additional node to the cluster.

Answer:

---

D

## Question 3

---

Question Type: MultipleChoice

---

An administrator has licensed vSphere components in Connected mode and then switched to Disconnected mode to meet the company security restrictions, which cannot be violated.

What must the administrator do to ensure the VMware vSphere Foundation license remains valid?

Options:

---

- A- Switch to Connected mode, validate that VCF Operations has downloaded a new license file from VCF Business Services console, and then switch to Disconnected mode at least once every 365 days.
- B- Manually exchange a registration and license file between the VCF Operations instance and the VCF Business Services console at least once every 180 days.
- C- Nothing. The license is perpetual.
- D- Provide an internet connection to VCF Operations, then download a new license file from the VCF Business Services console at least once every 180 days.

Answer:

---

B

## Question 4

---

Question Type: MultipleChoice

---

An administrator has enabled a Supervisor on a vSphere cluster. The DevOps team has requested access to vSphere resources such as virtual machines, storage, and networking using Kubernetes tooling. To meet this request, the administrator must provide secure, policy-based access that sets clear boundaries for compute and storage consumption.

Which function is provided by Supervisor services to support this use case?

Options:

---

- A- Allow access to vSphere resources through Kubernetes in a configured Supervisor Namespace.

- B- Enable virtual machine backup using native Kubernetes ConfigMaps.
- C- Enable vSphere Replication between Supervisor Namespaces.
- D- Grant DevOps users administrator access to the vCenter Server system namespace.

Answer:

---

A

## Question 5

---

Question Type: MultipleChoice

---

Which of the following statements describes hardware abstraction in VMware server virtualization?

Options:

---

- A- Encrypting all data processed by a virtual machine on the operating system level.
- B- Isolating memory access from the operating system and applications running in a virtual machine.
- C- Allowing virtual machines to be live migrated between physical servers with Intel and AMD processors.
- D- Allowing virtual machines (VMs) to use hardware resources without being tied to specific physical devices.

Answer:

---

D

## Question 6

---

Question Type: MultipleChoice

---

An organization requires a centralized platform to monitor the performance, health, and capacity of their entire VMware vSphere Foundation (VVF) environment.

Which two components would provide this capability? (Choose two.)

Options:

---

- A- VCF Operations for Networks
- B- VCF Operations

- C- VCF Operations for Logs
- D- vSphere Supervisor

Answer:

---

B, C

## Question 7

---

Question Type: MultipleChoice

---

In VMware Cloud Foundation (VCF) Operations for Logs, which node type is responsible for coordinating the overall functioning of the cluster?

Options:

---

- A- Worker Node
- B- Replica Node
- C- Primary Node
- D- Data Node

Answer:

---

C
