Question 1

Question Type: MultipleChoice

Which two are installed on the target cluster when VMware Tanzu Mission Control Data Protection is enabled? (Choose two.)

Options:

- A- VMware Tanzu Mission Control agent
- B- Velero
- C- FluentBit
- D- Data protection extension
- E- Antrea

Answer:

B, D

Question 2

Question Type: MultipleChoice

Which component must be installed upfront to deploy VMware Tanzu Kubernetes Grid management cluster?

Options:

- A- Tanzu CLI
- B- Cluster API
- C- Kubeadm
- D- External DNS

Answer:

A

Question 3

Question Type: MultipleChoice

What Kubernetes project does vSphere with Tanzu Supervisor Cluster use to automate the lifecycle management of Tanzu Kubernetes Grid Clusters?

Options:

- A- Grafana
- B- Cluster API
- C- Contour
- D- Kubeadm

Answer:

B

Question 4

Question Type: MultipleChoice

Which Kubernetes object controls what traffic is allowed to and from selected pods and network endpoints?

Options:

- A- Ingress
- B- NetworkPolicy
- C- PodSecurityPolicy
- D- ISecret

Answer:

D

Question 5

Question Type: MultipleChoice

Which VMware product UI allows browsing Global Namespace Topology?

Options:

- A- NSX Advanced Load Balancer
- B- NSX
- C- Tanzu Service Mesh Advanced
- D- Tanzu Mission Control

Answer:

C

Question 6

Question Type: MultipleChoice

Which two StorageClass objects are supported by the VMware Tanzu Kubernetes Grid? (Choose two.)

Options:

- A- Azure Glacier
- B- vSphere Cloud Native Storage (CNS)
- C- Linux Remote File Services
- D- Samba
- E- Amazon EBS

Answer:

B, E

Question 7

Question Type: MultipleChoice

Which statement describes a Global Namespace in VMware Tanzu Service Mesh?

Options:

- A- Apply a single policy to multiple namespaces across multiple clusters.
- B- Automatic placement of the workload to any global cluster based on traffic demand.
- C- Define an application boundary and provides consistent traffic routing, connectivity, resiliency, and security for applications across multiple clusters.
- D- Provide distributed ingress and egress services to support multiple namespaces across multiple clusters.

Answer:

C

Question 8

Question Type: MultipleChoice

What steps are required to deploy an application to a Kubernetes cluster using VMware Tanzu Mission Control (TMC) catalog?

Options:

- A- From the TMC Console, in Catalog, select the package to install, select Install Package
- B- From the TMC Console, in Catalog, from Available Tanzu Packages, specify the target cluster and the package to install
- C- Using the Tanzu CLI, enter the command `tanzu package install`
- D- Using the TMC CLI, enter the command `tmc cluster tanzupackage create`

Answer:

A

Question 9

Question Type: MultipleChoice

What is the purpose of a service mesh?

Options:

A- Provides dynamic application load balancing and autoscaling across multiple clusters and multiple sites.

B- Provides a centralized, global routing table to simplify and optimize traffic management.

C- Provides service discovery across multiple clusters.

D- Provides an infrastructure layer that makes communication between applications possible, structured, and observable.

Answer:

D
