Question 1

Question Type: MultipleChoice

Which deployment achieves high availability of VMware Cloud Director 10.x when using virtual appliances?

Options:

- A- Three application cell appliances with an external database
- B- Three primary appliances and setup database replication
- C- One primary appliance and two application cell appliances
- D- One primary appliance and two standby appliances

Answer:

D

Explanation:

<https://docs.vmware.com/en/VMware-Cloud-Director/10.0/com.vmware.vcloud.install.doc/GUID-26E41AD2-0268-4B12-9505-9F729C5EF63E.html#:~:text=The%20vCloud%20Director%20appliance%20includes,a%20cluster%20of%20PostgreSQL%20servers.>

Question 2

Question Type: MultipleChoice

The system administrator has to configure transfer server storage during the deployment of a VMware Cloud Director appliance.

What are two purposes of this storage? (Choose two.)

Options:

- A- For VMware Cloud Director appliance database backups
- B- As temporary storage for vApp and media uploads and downloads
- C- Used when upgrading a vSphere datastore to a newer VMFS version
- D- For network traffic when Cross-VDC Networking is enabled

E- Used during Storage vMotion based migration of virtual machines

Answer:

A, B

Question 3

Question Type: MultipleChoice

What is the pre-requisite for resetting a vApp?

Options:

- A- The vApp and the VMs in it must be powered on.
- B- The VMs in the vApp must be running with the latest hardware version supported by the vCenter Server.
- C- The vApp must not have any added network.
- D- The vApp must be in a powered-off state.

Answer:

A

Question 4

Question Type: MultipleChoice

On which type of network in VMware Cloud Director can fence mode be enabled?

Options:

- A- Isolated vApp Network
- B- Direct vApp Network
- C- External Network
- D- Routed vApp Network

Answer:

Question 5

Question Type: MultipleChoice

The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once.

How should the administrator accomplish this goal?

Options:

- A- Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
- B- Configure a syslog server on each of the cells, and request the logs from the syslog server.
- C- Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
- D- Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

Answer:

D

Explanation:

For multiple cells and packages, use this command and syntax to collect all the log bundles. The command will place the bundle in the transfer directory and report the exact location: Running a Multi-Cell Log Collection will not collect the Java Thread Dump, if required, run a Single Log Collection from the required Cells. `/opt/vmware/vcloud-director/bin/vmware-vcd-support --all -m`

Question 6

Question Type: MultipleChoice

A tenant has requested to extend their Organization VDC network through a Layer 2 VPN. Which interface type is needed on the NSX for vSphere Edge Gateway to support this configuration?

Options:

- A- Routed
- B- Subinterface
- C- Internal
- D- Distributed

Answer:

B

Question 7

Question Type: MultipleChoice

What is the final configuration step before a tenant can log into a dedicated vCenter Server using Central Point of Management?

Options:

- A- The tenant user needs to configure the browser with the generated proxy settings shown in the tenant portal.
- B- The system administrator needs to configure the browser with the generated proxy settings shown in the tenant portal.
- C- The system administrator needs to configure additional permissions in vCenter Server for the tenant.
- D- The tenant user has to connect to a VPN connection in the network where the vCenter Server is connected.

Answer:

B

Question 8

Question Type: MultipleChoice

A tenant user wants to increase the size of a VM's hard disk in the VMware Cloud Director Tenant Portal.

Which Organization VDC setting can prevent this from actually occurring?

Options:

- A- Thin provisioning is enabled for the Organization VDC in which the VM is running.
- B- VM Encryption is enabled for the storage policies used by the Organization VDC.
- C- IOPS Limiting is enabled for the Organization VDC in which the VM is running.
- D- Fast Provisioning is enabled for the Organization VDC in which the VM is running.

Answer:

D

Explanation:

- We can increase the size of an existing hard disk if the virtual machine is not a linked clone and it has no snapshots.

- Fast provisioning saves time by using linked clones for virtual machine provisioning operations.

- A linked clone is a duplicate of a virtual machine that uses the same base disk as the original, with a chain of delta disks to keep track of the differences between the original and the clone.

Question 9

Question Type: MultipleChoice

The runtime lease of a virtual machine is about to expire. The administrator would like to extend the lease time.

Which action should be taken to complete this task?

Options:

- A- Renew the lease from the vApp action menu.
- B- Extend the storage lease, and runtime will automatically be extended.
- C- Use the /api/renewlease endpoint to define a new lease time.
- D- Renew the VM lease only after renewing the vApp lease.

Answer:

A
