# Question 1

---

Question Type: MultipleChoice

---

A company manages its regional operations as separate businesses. The regional sites (Site A and Site B) operate with:

- \* Separate realms
- \* Different code bases
- \* Different category navigation menus
- \* Frequent updates on category structure

The requirement from the business is to provide hreflang link tags on category pages pointing to the same category on the other regional site. Example HTML for one of these links as displayed on Site A is:

```
<link rel="alternate" href="https://www.siteB.com/en_US/womens-new-arrivals" hreflang="en_US" />
```

Which solution should the Architect choose while keeping performance in mind?

## Options:

---

- A- Create a new custom attribute on the Category. Populate the attribute with the other entire site URLs corresponding to locales in JSON Format. Use the attribute to display the hreflang link tag.
- B- Create a new custom object type. Populate the hreflang mapping for each category and locale in this custom object. Use the custom object to display the hreflang link tag.
- C- Create additional locales in all realms. Create a new custom attribute on the category that is localized. Populate the attribute with the other site URLs and use it to display the hreflang tag.
- D- Create a custom Business Manager module. Ask the business to maintain the hreflang link tags for each regional site in this Business Manager module.

## Answer:

---

A

# Question 2

---

Question Type: MultipleChoice

---

A client has a single site with multiple domains, locales, and languages. After launch, there is a need for the client to perform offline maintenance. The client would like to show the same maintenance page for each locale.

Which version of aliases.json file below will accomplish this task?

A)

```
{
  "nto.net": "www.ntonet",
  "nto.eu": "www.nton.eu",
  "nto.event.eu": "www.nton.eu"
}
```

B)

```
{
  "www.nton.eu": "www.nton.eu"
}
```

```
{
  "nton.eu": "www.nton.eu",
  "nton.at": "www.nton.at",
  "nton.de": "www.nton.de"
}
```

D)

```
{
  "nton.eu": "www.nton.eu",
  "nton.at": "www.nton.eu",
  "nton.de": "www.nton.eu"
}
```

### Options:

---

- A- Option A
- B- Option B
- C- Option C
- D- Option D

### Answer:

---

D

## Question 3

---

Question Type: MultipleChoice

---

The client provided these business requirements:

- \* The B2C Commerce platform will integrate with the client's Order Management System (OMS).
- \* The OMS supports Integration us-no legacy RPC style SOAP services.
- \* The OMS is hosted on client s infrastructure.

What is the right cartridge folder to place the WSDL provided for the OMS service?

Options:

- A- /cartridge/webreferences2
- B- /cartridge/webreferences
- C- /cartridge
- D- /cartridge/services

Answer:

B

## Question 4

---

Question Type: MultipleChoice

---

A third party survey provider offers both an API endpoint for individual survey data and an SFTP server endpoint that can accept batch survey dat

a. The initial implementation of the integration includes

1. Marking the order as requiring a survey before order placement
2. On the order confirmation pace, the survey form is displayed for the customer to fill
3. The data is sent to the survey provider API, and the order it marked as not requiring a survey

Later it was identified that this solution is not fit for purpose as the following issues and additional requirements were identified:

1. If the API call fails, the corresponding survey data is lost. The Business requires to avoid data loss.
2. Some customers skipped the form. The Business require sending a survey email to such customers.

3. The Order Management System (OMS) uses a non-standard XML parser it did not manage to parse orders with the survey, until the survey attribute was manually removed from the xml.

How should the Architect address the issues and requirements described above?

### Options:

---

- A- Create a custom session attribute when the survey is required. Send to the API endpoint in real-time. On failure, capture the survey data in the session and reprocess, use the session attribute to send emails for the cases when survey was skipped.
- B- Create a custom object to store the survey data. Send to the API endpoint using a job. On success, remove the custom object. On failure, send the survey data with API from the next execution of the same job. Use the custom object to send emails for the cases when the survey was skipped.
- C- Create a custom object when the survey is required. Send to the API endpoint in real-time. On success, remove the object. On failure, capture the survey data in the custom object and later reprocess with a job. Use the custom object to send emails for the cases when survey was skipped.
- D- Send the survey data to the API endpoint in real-time until the survey data is successfully captured. Instruct the OMS development team to update their XML parser, use the Order survey attribute to send emails for the cases when the survey was skipped.

### Answer:

---

C

## Question 5

---

Question Type: MultipleChoice

---

A company that is a shoe-producer is doing Salesforce B2C Commerce implementation. In their Enterprise Resource Planning (ERP) system, the products are marked as being one of three types: boots, sandals, and sneakers. The business requirements based on the type are:

- \* The messaging on Product Detail page is different
- \* Customers are able to filter their Product Search Results

The customer's operations team asks about the format in which to send this value in the catalog.

Which data type should the Architect specify for this attribute in the Data Mapping document?

### Options:

---

- A- A custom attribute of type string containing comma separated values.
- B- A custom attribute type set-of-string containing multiple values.

- C- A custom attribute of type enum-of-string (multiselect able value).
- D- A custom attribute of type enum-of-string (single selectable value)

Answer:

---

D

## Question 6

---

Question Type: MultipleChoice

---

Given a website launched to production, the Architect can rely on several SFCC Business Manager tools that provide an automatic notification feature.

Which three tools have such a feature and do not require to be monitored manually?

Choose 3 answers

Options:

---

- A- Job Schedules
- B- Custom Log Settings
- C- Analytics Conversion Reports
- D- Pipeline Profiler
- E- Quota Status

Answer:

---

A, C, E

## Question 7

---

Question Type: MultipleChoice

---

Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer's post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.

What are the two feasible technical approaches to meet these requirements?

Choose 2 answers

## Options:

---

- A- Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method. Show only the products that are not excluded from the shipping method.
- B- Create a separate category per physical store use post/Zip code with a mapping to determine the relevant category. Show only the products from this category.
- C- Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site. Show the products from the site navigation catalog.
- D- Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.

## Answer:

---

A, D
