Question: 1

Which statement is true about shared libraries?

- A. If a shared library (A) references another shared library (B), shared library (B) can create a reference to shared library (A)
- B. Static libraries can reference shared libraries but cannot reference other static libraries
- C. Integration Projects can reference shared libraries
- D. A shared library must be deployed with or before an application that references it

Answer: B

Question: 2

How can an MQGet node be configured to read a message from a queue without deleting it?

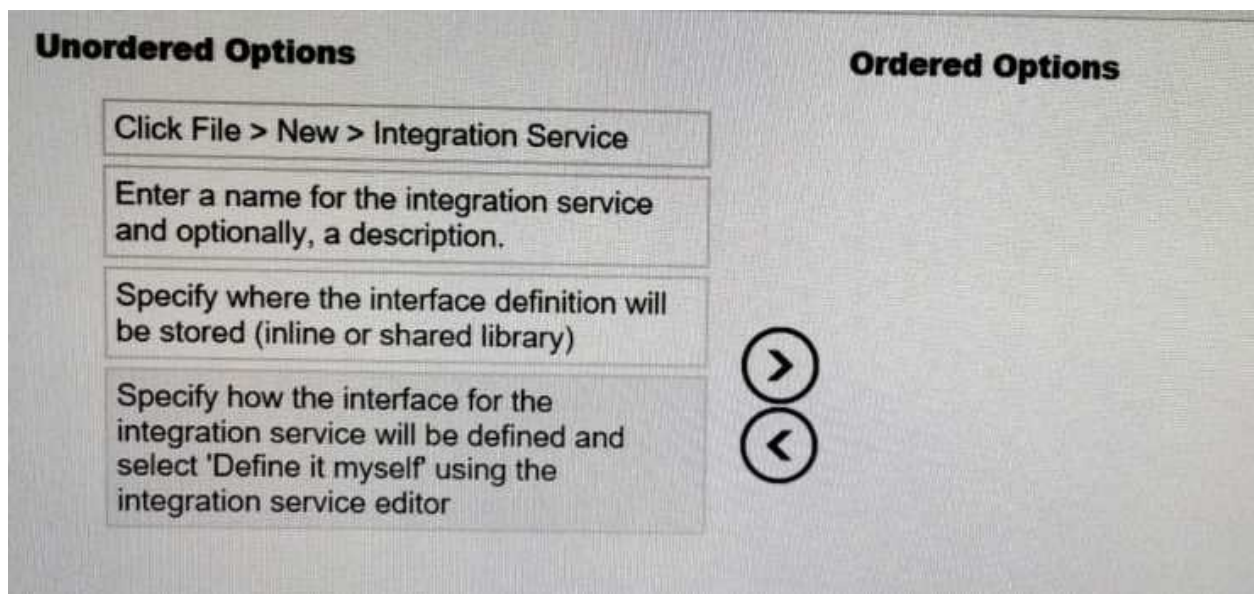

- A. Set "Copy Message" property to None
- B. Check the "Read Only" property
- C. Set "Generate Mode" property to None
- D. Check the "Browse Only" property

Answer: A

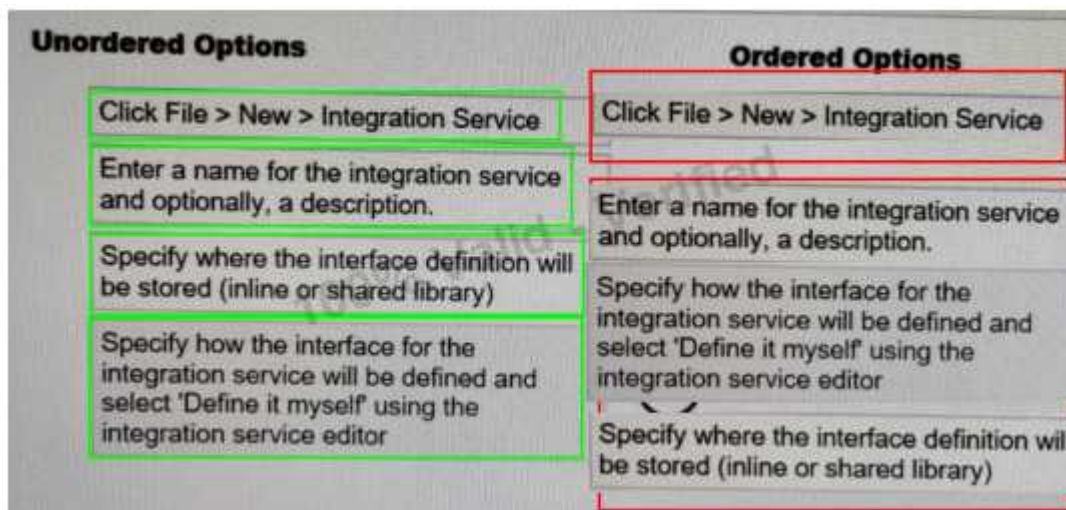

Question: 3

DRAG DROP

What is the correct order of steps to create an Integration Service from scratch?

Answer:

Explanation:

To create an integration service by defining a new interface, complete the following steps:

Procedure

- Open the New Integration Service wizard by using one of the following methods:
- Click File > New > Integration Service.
- In the Application Development view, click New > Start by creating an integration service.
- Right-click the white space of the Application Development view then click New > Integration Service.
- Enter a name for the integration service, and optionally a description.
- To specify how you want to define the interface for your integration service, select Define it myself using the integration service editor.
- Specify where you want to store your interface definition.
- If the definition will be used by this integration service only, store the definition in the integration service project.
- If the definition might be used by multiple integration services, store the definition in a shared library.

Question: 4

What is one reason to organize resources into applications?

- A. It enables all processes using the module to reference the latest versions
- B. It enables the ability to reference the resources in an Integration Project
- C. It allows for Java and ESQL support in the same message flow
- D. It provides runtime isolation of resources

Answer: D

Question: 5

What is the maximum number of integration servers that can be used in a single server running IBM App Connect Enterprise?

- A. Up to 512
- B. Unlimited
- C. Up to 256
- D. Up to 128

Answer: B
