Question 1

You have been brought on to manage a recognition project, specifically an image recognition project, for an Autonomous Retail application. You know that you need to make sure you have sufficient data for this project.

What's the best way to approach this?

Options:

A- Take all the data your company has as well as purchase additional external data
B- Take inventory of all data your company has and use the relevant data
C- Take all the existing data you have and apply it to this project
D- Take inventory of all data your team has and use the relevant data

Answer:

B

Question 2

A team has started working on their first AI project and they are running this project like a traditional software development project. About two months into the project the team is hitting some major issues, and you're tasked with coming in to help manage this project. Immediately you realize that AI projects need to be treated like data centric projects.

What's the next best course of action?

Options:

A- Bring in data centric methodology best practices to get this project back on track
B- Get the existing team up to speed and make sure existing Agile approaches can support the AI effort
C- Hire an entirely new team making sure there is at least one data scientist on this new team
D- Hire an outside consulting firm to handle the technical aspects while you train the team yourself on data centric best practices

A
