Question 1

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

A manager can represent only a single country.

You need to use row-level security (RLS) to meet the following requirements:

The managers must only see the data of their respective country.

The number of RLS roles must be minimized.

Which two actions should you perform? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Create a single role that filters Country[Manager_Email] by using the USERNAME DAX function.
- B- Create a single role that filters Country[Manager_Email] by using the USEROBJECTID DAX function.
- C- For the relationship between Purchase Detail and Purchase, select Apply security filter in both directions.
- D- Create one role for each country.
- E- For the relationship between Purchase and Purchase Detail, change the Cross filter direction to Single.

Answer:

A, C

Explanation:

In Power BI Service the username and userprincipalname both return the email address, it's only in Power BI Desktop that username is domain/username rather than the email address. So I agree that userprincipalname is better generally as you always get the same value, the answer is correct and you can use username as your RLS since the role will be applied in the Service. See <https://community.powerbi.com/t5/Community-Blog/USERNAME-v-s-USERPRINCIPALNAME-in-RLS-for-Power-BI-Embedded/ba-p/1867670> for more information.

Question 2

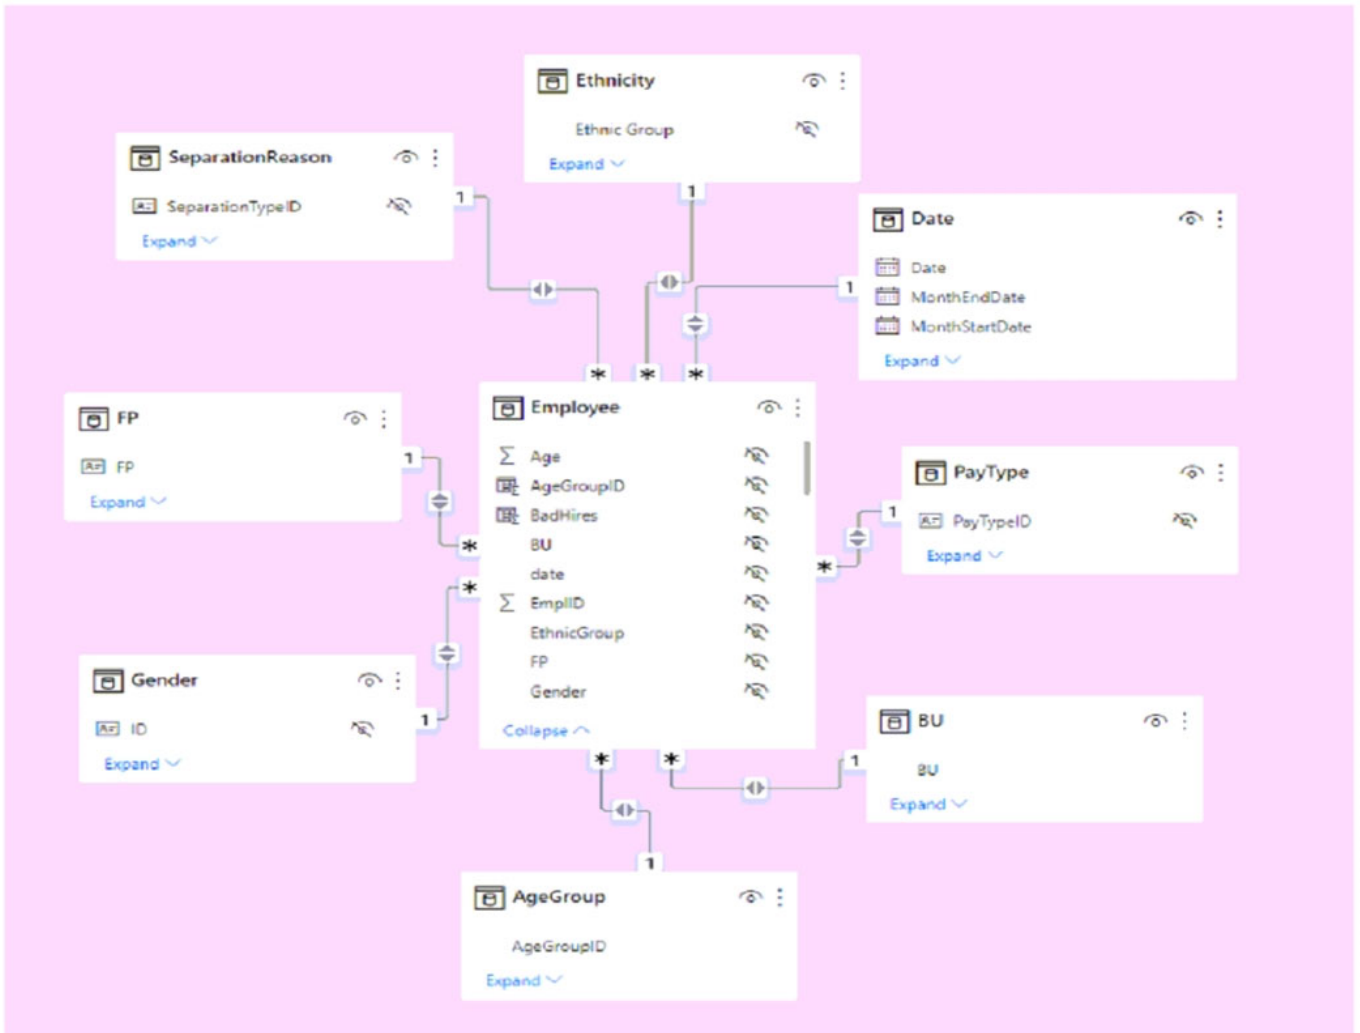

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

You have a Power BI imported dataset that contains the data model shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

Changing the [answer choke] setting of the relationships will improve report query performance.

	▼
Cardinality	
Cross filter direction	
Assume Referential Integrity	

The data model is organized into a [answer choice].

	▼
star schema	
snowflake schema	
denormalized table	

Answer:

See the Answer in the Premium Version!

Question 3

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

You build a Power BI report that displays 10T temperature data streaming from a refrigerator.

You publish the report to the BI service.

You need to be notified when the temperature rises above four degrees Celsius.

What should you do?

Options:

- A- Pin a report page to a dashboard and set an alert on the page.
- B- Set an alert on a KPI visual in the report.
- C- Pin a card visual to a dashboard and set an alert on the tile.
- D- Pin a card visual to a dashboard and create a subscription.

Answer:

A

Question 4

Question Type: MultipleChoice

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

You need to create a Power BI theme that will be used in multiple reports. The theme will include corporate branding for font size, color, and bar chart formatting.

What should you do?

Options:

- A- Create a theme as a PBIVIZ file and import the theme into Power BI Desktop.
- B- Create a theme as a JSON file and import the theme into Power BI Desktop.
- C- From Power BI Desktop, use a built-in report theme.
- D- From Power BI Desktop, customize the current theme.

Answer:

D

Question 5

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

You have a Power BI report that contains five pages.

Pages 1 to 4 are visible and page 5 is hidden.

You need to create a solution that will enable users to quickly navigate from the first page to all the other visible pages. The solution must minimize development and maintenance effort as pages are added to the report.

What should you do first?

Options:

- A- Add a blank button to page 1.
- B- Add a bookmark navigation button to page 1.
- C- Create a bookmark for each page.
- D- Add a page navigation button to page 1.

Answer:

C

Question 6

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

You use Power BI Desktop to load data from a Microsoft SQL Server database.

While waiting for the data to load, you receive the following error.

```
ERROR [08001] timeout expired
```

You need to resolve the error.

What are two ways to achieve the goal? Each correct answer presents a complete solution

NOTE: Each correct selection is worth one point.

Options:

- A- Split long running queries into subsets Of columns and use power Query to the queries
- B- Disable query folding on long running queries
- C- Reduce number of rows and columns returned by each query.
- D- Use Power Query to combine long running queries into one query.

Answer:

B, D

Question 7

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-300 Mix Questions IN THIS CASE STUDY

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

From Power Query Editor, you profile the data shown in the following exhibit.

	A ^B _C IoT GUID	IoT DateTime	IoT ID
	Valid 100% Error 0% Empty 0%	Valid 100% Error 0% Empty 0%	Valid 100% Error 0% Empty 0%
1	48196321-38D9-EC11-883D-0022489A2...	21/05/2022 18:59:25	100001000
2	49196321-38D9-EC11-883D-0022489A2...	21/05/2022 18:59:26	100001001
3	0300C742-38D9-EC11-883D-0022489A2...	21/05/2022 19:00:21	100001002
4	0400C742-38D9-EC11-883D-0022489A2...	21/05/2022 19:00:21	100001003
5	0500C742-38D9-EC11-883D-0022489A2...	21/05/2022 19:00:21	100001004
6	0600C742-38D9-EC11-883D-0022489A2...	21/05/2022 19:00:21	100001005

The IOT ID columns are unique to each row in query.

You need to analyze 10T events by the hour and day of the year. The solution must improve dataset performance.

Solution: You change the IOT DateTime column to the Date data type.

Does this meet the goal?

Options:

A- Yes

B- No
