Question 1

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

A company is struggling to gather insights from won and lost opportunities.

Users must be able to access the company's solution from mobile and desktop devices. The solution must meet the following requirements:

context of other related data.

Display data to users as charts and tables and provide drill-through capabilities.

You need to recommend a Power Platform tool to help the client visualize the data.

Which two technologies should you recommend? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- Power BI

B- Power Automate

C- Power Virtual Agents

D- Power Apps

Answer:

A, D

Explanation:

A: Power BI is a business analytics service by Microsoft. It aims to provide interactive visualizations and business intelligence capabilities with an interface simple enough for end users to create their own reports and dashboards. It is part of the Microsoft Power Platform.

D: Power BI Apps are an easy way for designers to share different types of content at one time. App designers create the dashboards and reports and bundle them together into an app. The designers then share or publish the app to a location where you, the business user, can access it. Because related dashboards and reports are bundled together, it's easier for you to find and install in both the Power BI service (<https://powerbi.com>) and on your mobile device. After you install an app, you don't

have to remember the names of a lot of different dashboards or reports because they're all together in one app, in your browser or on your mobile device.

Question 2

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

You are designing a Power Platform solution for a company. The company issues each employee a tablet device.

The company wants to simplify the opportunity management processes and automate when possible. The company identifies the following requirements:

Users must have a visual guide to know which data to enter in each step of the opportunity management process.

The system must automatically assign the opportunity to a manager for approval once all data is entered.

The system must notify an assignee each time an opportunity is assigned to them by using push notifications.

When a user selects a push notification, the associated opportunity must display.

You need to recommend the Power Platform components that will meet their requirements.

Which three Power Platform components should you recommend? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Business process flows
- B- Power Apps mobile apps
- C- Power Virtual Agents chatbots
- D- Power Automate desktop flows
- E- Power Automate cloud flows

Answer:

A, B, E

Explanation:

A: Use business process flows to define a set of steps for people to follow to take them to a desired outcome. These steps provide a visual indicator that tells people where they are in the business process.

B: Push notifications are used in Power Apps mobile to engage app users and help them prioritize key tasks. In Power Apps, you can create notifications for Power Apps mobile by using the Power Apps Notification connector. You can send notifications to any app that you create in Power Apps.

E: Create a cloud flow when you want your automation to be triggered either automatically, instantly, or via a schedule.

Question 3

Question Type: DragDrop

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

You are reviewing a list of business requirements submitted by a plumbing company.

The company has the following requirements:

Send articles to technicians to allow technicians to help customers resolve issues.

Track work progress and inspections at customer sites.

Schedule technicians for service appointments.

You need to recommend solutions to meet the customer's requirements.

What should you recommend? To answer, drag the appropriate solutions to the correct business requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions

Dynamics 365 Field Service

Dynamics 365 Customer Voice

Dynamics 365 Customer Insights

Answer Area

Business requirement

Send articles to technicians to allow technicians to help customers resolve issues.

Track work progress and inspections at customer sites.

Schedule technicians for service appointments.

Question 4

Question Type: DragDrop

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

A new customer asks you to design a solution for a Power Apps app that uses Microsoft Dataverse.

The customer wants to keep the service process simple and save on both licensing and development time.

You need to recommend solutions for the customer.

What should you recommend? To answer, drag the appropriate setting to the correct drop targets. Each source may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Solutions

Canvas app

Model-driven app

Dynamics 365 Customer Service

Answer Area

Scenario

Show the app in Microsoft Outlook.

Use Universal Resource Scheduling.

Take notes on a mobile phone and record GPS coordinates automatically.

Question 5

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

A company reports the following issues with an existing data management system.

Users cannot search for specific records by using a user-friendly ID or record identifier.

Users occasionally enter data into fields that is not required.

The record form displays all fields. Many of the fields are not used.

You need to ensure that the Power Platform solution will ensure data quality can be properly maintained.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Ensure that users can search for specific records by using a unique identifier.

You must prevent data entry into columns that do not require entry.

Solution

	▼
Business rule	
Autonumber column	
Business process flow	
Duplicate detection rule	

	▼
Business rule	
Real time workflow	
Business process flow	
Duplicate detection rule	

Answer:

See the Answer in the Premium Version!

Explanation:

Question 6

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

A company plans to create a Microsoft Power Platform solution that integrates with Dynamics 365 Sates. The solution must meet the following requirements:

* Connect directly with a Microsoft Azure SQL database as an external data source at run time where specific data is available in the Dynamics 365 Sales solution without the need for data replication.

* An external system needs to send data to the company's Dynamics 365 Sales solution.

You need to recommend the most suitable solution to integrate Dynamics 365 Sales with both systems.

What should you recommend? To answer, select the appropriate option in the answer area.

Answer Area

Integration requirement	Solutions
Have read-only visibility of data from an external Azure SQL database.	<ul style="list-style-type: none">Use virtual tables.Use a custom plug-in.Use Dynamics 365 Web API.Use a web resource to display data.
External system sends data to Dynamics 365 Sales.	<ul style="list-style-type: none">Use a custom plug-in.Use Dynamics 365 Web API.Use a web resource to display data.

Answer:

Question 7

Question Type: MultipleChoice

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

You are designing tables and columns for a Microsoft Power Platform solution

The solution will contain an interactive experience dashboard.

You need to ensure that the columns you create can be used as global filters for the dashboard

Which two data types can you use? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point

Options:

A- Yes/No

B- Choice

C- Text

D- Multiline Text

E- Lookup

Answer:

A, B

Explanation:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-solution-explorer#column-data-types>

With interactive dashboards, a chart uses the color assigned to the categories that make up the different values, even if the chart is configured to use random colors, when the chart is configured to be grouped by any of the following column types:

Choice

Yes/No

Status Reason

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/configure-interactive-experience-dashboards>

Question 8

Question Type: Hotspot

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

A multinational organization uses a single Microsoft Power Platform environment. The instance hosts multiple customizations for different users in different regions.

Users in some regions complain about slow load time of the customizations.

You need to architect a solution based on the main requirement.

What should you recommend? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

Goal	Suggested solution
Divisions actively collaborate on customers.	Single instance; use Microsoft Azure Traffic Manager where needed Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate customers but use the same functionality and need global reporting.	Multiple instances in different regions with data replication Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance
Regions have separate functionality and customers but need global reporting on data.	Single instance; use Microsoft Azure Traffic Manager Multi-tenant with one Power Platform environment in each region Multiple instances in different regions; Power BI for reporting Single multi-geo instance

Question 9

Question Type: DragDrop

Case Study: Mix Questions

Mix Questions

PL-600 Mix Questions IN THIS CASE STUDY

You are designing data loss policies for a Microsoft Power Platform implementation. You have the following requirements:

- * Solutions that use the HTTP connector must not include any other connectors.
- * Prevent the use of the Microsoft Forms connector.
- * Allow the use of the Azure DevOps connector.

You need to determine in which data policy group to add each connector.

Data policy groups

Connector

Data policy group

Business	HTTP connector	
Non-business	Azure DevOps connector	
Blocked	Microsoft Forms connector	

Answer:

See the Answer in the Premium Version!

Explanation:

<https://docs.microsoft.com/en-us/power-platform/admin/wp-data-loss-prevention>
