Question 1

Question Type: MultipleChoice

Where should individual quality control activities, such as testing and reviews, be scheduled within a PRINCE2 project?

Options:

- A- As quality tolerances in product descriptions
- B- In the quality management approach to define quality standards
- C- As acceptance criteria in the project product description
- D- In stage or team plans to allow more accurate scheduling

Answer:

D

Explanation:

The correct answer is D because individual quality control activities, such as tests, inspections, reviews, demos, or quality checks, need time, resources, dependencies, and dates. Therefore, they should be scheduled in the relevant stage plan or team plan so the project manager and team manager can manage the work accurately.

Option A is incorrect because quality tolerances define allowable variation, not the timing of individual quality activities. Option B is incorrect because the quality management approach defines the overall approach, standards, techniques, roles, and responsibilities, but it is not the detailed schedule for each individual test or review. Option C is incorrect because acceptance criteria define what must be met for acceptance; they do not schedule the quality control work.

PRINCE2 planning guidance includes identifying activities and dependencies after defining products, and quality-checking activities should be considered when identifying activities. PRINCE2 also recognizes that quality checking, such as reviews, demos, or tests, can significantly affect how a project is planned.

Question 2

Question Type: MultipleChoice

The project manager needs to plan the reviews to confirm whether the expected measurable improvements have been achieved.

Options:

- A- Benefits management approach
- B- Business case
- C- Quality management approach
- D- End project report

Answer:

A

Question 3

Question Type: MultipleChoice

Which action should the project manager take when reviewing trends in performance to assess the 'health' of a stage?

Options:

- A- Capture lessons that may assist in the monitoring and control of this project
- B- Review the quality of the relationships in the organizational ecosystem
- C- Increase the frequency of event-driven controls to monitor stage progress
- D- Identify whether issues are resolved in a timely manner or left unmanaged

Answer:

D

Question 4

Question Type: MultipleChoice

The project manager needs to report to the project board on the status of the project's Issues.

Options:

- A- Project log
- B- Project brief
- C- Lessons report
- D- Change management approach

Answer:

A

Question 5

Question Type: MultipleChoice

Where are the user's quality expectations documented?

Options:

- A- In the project product description
- B- In the quality management approach
- C- In the stage plan
- D- In the product descriptions

Answer:

A

Question 6

Question Type: MultipleChoice

The senior user needs to understand how user assurance will support the senior user on the project.

Options:

- A- Project plan
- B- Project management team structure
- C- Role descriptions
- D- Project log

Answer:

C

Question 7

Question Type: MultipleChoice

Which term is defined as the means by which an organization transitions to the target state?

Options:

- A- Change management
- B- Risk management
- C- Issue management
- D- Communication management

Answer:

A

Question 8

Question Type: MultipleChoice

Which term is defined as the result of change, normally affecting real-world behaviour and circumstances?

Options:

- A- Outcome
- B- Benefit
- C- Output
- D- Request for change

Answer:

A
